

UBER CLEAN

Development Plan

Ritika Garg

Overview of the Business

Uber is planning to enter the laundry business with a service that combines Uber's ride-sharing network with laundry and dry cleaning services. The new service, Uber Clean, will involve pickup, cleaning, and delivery of laundry from consumers' homes. It has planned to partner with industry giant Procter & Gamble (P&G) to create an on-demand laundry service.

Persona Name: Jack Smith

Profile • Job title: Staff Software Engineer • Job Role : Software Engineer • Responsibilities: Executing and developing code based on company strategy • Age: 26 • Education: MS in Computer Science • Experience: 2 years • Geography: Pittsburgh, PA • Company Size: 1K	Goals • Affordable laundry experiences • Timely pick-up and drop-off services on demand • Specialized services other than just wash & dry, like alterations and repair • Getting discounts/cashbacks for being a loyal customer • One stop solution for various day-to-day services		Challenges • Pain points – Scarcity of time, no quality assurance, inaccessibility, inconvenience • Worries – not looking presentable enough for business meetings and social outings • Time wasters – traveling in public transport to go far away laundry places
	Personality • Demeanor – Confident , Composed • Personality traits – Passionate, Cleanliness, Growth-oriented, Extrovert • Values – Health, Career, Friends	Information Sources • Media consumption – Internet Periodicals & Articles, Blogs, YouTube • Social networks – Instagram, Facebook, X (Twitter) • Watering holes – Reddit, LinkedIn • Influencers – Satya Nadella, Elon Musk, Linus Torvalds • Professional associations – Association for Computing Machinery (ACM), Institute of Electrical and Electronics Engineers (IEEE)	

Bio Jack is a single software professional who wakes up in morning, does cooking and rushes to office. Reaching home after work, he either cooks for himself or have food delivered and regularly does some online course to upskill himself. On weekends he does volunteering work or is out with his social group. Since his apartment does not have laundry facility, he barely has time to go out and do laundry. He likes to keep his place and himself tidy. The major players of laundry service like Rinse are not yet available in his area and the nearby local mom and pop shops does not provide pick and drop services as well quality guarantee for their services. Whenever he has to go out, he is always looking for clean and ironed clothes.

Jobs to be Done

1. As a single working professional, I want to have my laundry picked up and delivered, so I can enjoy freshly laundered clothes without hassle.
2. As a single working professional, I want to find a reliable laundry service, so I can free up my evenings and weekends for more important activities.
3. As a single working professional, I want to have my laundry folded and neatly packaged, so I can save time on household chores.
4. As a single working professional, I want to access dry cleaning services for my suits and delicate garments, so I can always look my best.
5. As a single working professional, I want to request laundry for my bed linens and towels, so I can enjoy a hotel-like experience in my own home.
6. As a single working professional, I want to receive laundry reminders and updates, so I can stay on top of my clothing care routine without thinking about it.
7. As a single working professional, I want to book laundry services for special occasions, so I can have a fresh wardrobe for important events.
8. As a single working professional, I want to choose eco-friendly laundry options, so I can contribute to a sustainable lifestyle without extra effort.
9. As a single working professional, I want to request stain removal and garment repairs, so I can extend the lifespan of my favorite clothing items.
10. As a single working professional, I want to request one-time laundry for vacations or business trips, so I can pack and unpack stress-free.

Areas of Opportunity

As a single working professional, I want to have my laundry picked up and delivered, so I can enjoy freshly laundered clothes without hassle.

As a single working professional, I want to request one-time laundry for vacations or business trips, so I can pack and unpack stress-free.

As a single working professional, I want to find a reliable laundry service, so I can free up my evenings and weekends for more important activities.

As a single working professional, I want to request laundry for my bed linens and towels, so I can enjoy a hotel-like experience in my own home.

Product Brief

Essence of Opportunity: Uber's venture into an online laundry service in partnership with Tide aims to address a pressing need among single working professionals in the USA.

- The opportunity revolves around providing a convenient, time-saving solution for busy individuals who struggle with managing their laundry amidst their demanding professional lives.
- The essence lies in leveraging Uber's expansive network and Tide's trusted brand to offer a seamless, on-demand laundry service that caters specifically to the lifestyle of the modern working professional.

Buyer Persona:

Profile	Personality	Goals
• Job title: Staff Software engineer • Job Role : Software engineer • Responsibilities: Executing and developing code based on company strategy • Age: 26 • Education: MS in Computer Science • Experience: 2 years • Geography: Pittsburgh, PA • Company Size: 1K	• Demeanor – Confident , composed • Personality traits – Passionate, Cleanliness, growth-oriented, extrovert • Values – health, career , friends	• Affordable Laundry experiences • Timely pick-up and drop-off services on demand • Specialized services other than just wash & dry, like alterations and repair • Getting discounts/cashbacks for being a loyal customer • One stop solution for various day-to-day services Bio • Jack is a single software professional who wakes up in morning, does cooking and rushes to office. On weekends he does volunteering work or is out with his social group. since his apartment does not have laundry facility, he barely has time time to go out and do laundry. He likes to keep his place and himself tidy. The major player of laundry services like Rinse is not yet available and the nearby local mom and pop shops does not provide pick and drop services as well quality guarantee for their services. Whenever he has to go out he is always looking for clean and ironed clothes.

Product Brief

Product concept:

- It involves a user-friendly mobile application integrated with Uber's platform, allowing users to schedule laundry pickups and deliveries at their convenience.
- The primary needs addressed are time efficiency, convenience, and the assurance of Tide's quality in laundry care. Single working professionals often find it challenging to balance work/social commitments and household chores, making a reliable laundry service an attractive proposition.
- Evidence supporting this concept stems from the growing demand for on-demand services and the success of Tide's brand in ensuring high-quality fabric care. The viability of the product is reinforced by the prevalence of a target demographic that values time-saving solutions.

Market Sizing:

Product Brief

Business model: Uber clean will be leveraging 2 models -

- **Transaction model** that will ensure easy adoption and less friction from the customer. It can lead to more significant initial customer acquisition, making it easier to quickly build a user base.
- **Subscription-based service with tiered plans** catering to varying laundry needs. Offering subscription options for weekly or bi-weekly services ensures a steady revenue stream, while tiered plans can accommodate different levels of laundry volume.

Product Risks

Competitive Landscape	Assess the competitive landscape and potential market saturation. Conduct market research to understand competitors and experiment with unique value propositions to stand out	
Partnership Reliability	Dependence on Tide's reputation is a risk. Establish clear service level agreements and contingency plans to address any disruptions in the partnership.	User Adoption
Regulatory Compliance	Ensure compliance with local regulations related to laundry services. Conduct thorough legal research and collaborate with legal experts to navigate potential regulatory challenges.	Operational Challenges
		The critical risk is the acceptance of the service by the target demographic. To mitigate this, conduct a pilot launch in a select region, gather user feedback, and refine the service accordingly.
		Potential issues in managing laundry facilities and logistics could arise. Implement a phased rollout to identify operational challenges, addressing them before a full-scale launch.

Epic Stories

01

User Registration and Profile Management

- As a user, I want to create an account with my Uber credentials so that I can easily access the laundry service.
- As a user, I want to complete my laundry profile with details like location, laundry preferences, and payment information so that I don't have to fill in details on repeat.
- As a user, I want offers and updates personalised as per my profile.

02

Booking and Scheduling

- As a user, I want to choose a convenient pickup and delivery time slot for my laundry.
- As a user, I want to track the real-time status of my laundry order and receive update notifications.
- As a user, I want the option to reschedule or cancel my laundry order if needed.
- As a user, I want user-friendly interface to explore the right services

03

Payment

- As a user, I want the option to pay for laundry services using various payment methods, including credit cards and digital wallets.
- As a user, I want to receive detailed invoices for my laundry orders via email or app notifications.
- As a user, I want the ability to apply promo codes or discounts to my laundry orders

04

Quality Control and Feedback

- As a user, I want Uber to have a quality control process to maintain high service standards.
- As a user, I want to be informed of any issues or delays with my order promptly.
- As the user, I want to share feedback and receive quick response from customers.
- As a user, I want to see the feedback and service ratings of previous customers to make informed decisions.

MVP

We will introduce single feature MVP that will offer only the core functionality of scheduling laundry pickup and delivery.

Users could request a laundry pickup, choose a convenient time slot, and have their laundry delivered back to them after it's cleaned by using existing Uber driver network for logistic.

This MVP is a cost-effective way to validate Uber's opportunity hypothesis about the target audience, their problem, and the solution. This will help uber to come up feedback to work upon and make the improvement in final product.

This MVP would exclude additional features like user profiles, payment options, reviews, or advanced service offerings that Uber Clean intends to have in the final product.

Market sizing & Business Model

TAM

- Laundry service market worldwide : \$112 billion ([source](#))
- People choosing online laundry service : 17% ([source](#))
- Online laundry : \$19 billion

SAM

- Market size for USA only : 30% ([source](#))
 - People living in urban areas in USA : 80% ([source](#))
 - Single working professional urban USA : 35% ([source](#))
- $SAM : 19 \times 0.3 \times 0.8 \times 0.35 = \1.6 billion

SOM

- Share of market Uber Clean can get : 10% (assumption)
- SOM: \$160 million

Value Proposition and Positioning

Value Proposition:

Experience the difference with Uber Clean, powered by Tide. Say goodbye to laundry stress and hello to pristine garments! With our seamless pickup & delivery network and Tide's expert cleaning technology, your clothes receive the care they deserve. Trust Uber Clean for unparalleled convenience, reliability, and exceptional cleaning results. Reclaim your time and enjoy hassle-free laundry today!

Positioning/Messaging Strategy:

Position Uber Clean as the premium choice for discerning customers who prioritize convenience, reliability, and superior cleaning performance. Our messaging focuses on how our service is unbeatable combination of trusted convenience of Uber meets the cleaning power and expertise of Tide. Messaging will highlight the benefits like flexible plan, quality and trust that seamlessly fit into busy professionals demanding schedules.

Product Pitch

Are you tired of spending your valuable time on laundry chores instead of focusing on what truly matters to you? Are local laundry services falling short in terms of reliability and convenience? Do you wish to enjoy the freedom from this mundane task?

Introducing Uber Clean, you will get:

- **Time-Saving Convenience:** Imagine a service that picks up and delivers your laundry at a time that suits your schedule. No more time wasted on trips to the laundromat.
- **Reliable Quality with Tide Laundry:** Fed up with laundry mishaps & inconsistent cleaning results? With Uber Clean powered by Tide, you can trust that your garments will receive top-notch care every single time. Say goodbye to stains and hello to fresh, clean clothes.
- **Seamless Scheduling:** Struggling to find the right time for laundry amidst your busy day? With Uber, schedule pickups and drop-offs at your convenience, making laundry seamless.
- **Customized Preferences:** Everyone has unique preferences. Uber Clean lets you specify Cleaning & messaging requirements, ensuring your clothes are treated just the way you like.

We are redefining the laundry experience with Uber Clean. No more compromising your time and energy on tedious chores. Our service is tailored to fit seamlessly into your lifestyle, providing a reliable, convenient, and quality solution to all your laundry woes. So, ready to reclaim your time and enjoy hassle-free laundry? Try Uber Clean Today!

Customer and Market Development

Uber Clean will follow 'share of wallet' strategy.

Target Segments

- **Busy young professionals:** They often have demanding work schedules and commitments, leaving them with minimal time for household chores like laundry. They often have high disposable income and are willing to pay a premium.
- **Families with young children:** Such families typically generate a significant amount of laundry due to frequent clothing changes, spills, and messes that are challenging to keep up with juggling childcare and other household tasks. Professionally cleaned and sanitized children clothes will ensure peace of mind.

Markets

- **Virtual Wardrobe Management:** Develop a feature where users can virtually organize and manage their wardrobes through the app. This could include digital cataloging of clothes, suggestions for outfit combinations, and reminders for seasonal wardrobe rotations.
- **Partnership for subscription-based Clothing Rental:** Expand services to include a clothing rental subscription model for partnering with cloth rental providers. Users can rent clothing items for special occasions, reducing the need for constant wardrobe expansion and promoting sustainable fashion practices.

Growth Tactics

One metric that matters **Customer Happiness Index**. The overall satisfaction and happiness of your customers with your laundry service. It takes into account factors such as ease of use, reliability, customer support experience, and perceived value.

Contests	Influencer Marketing
Run a contest where customers can interact with emotionally intelligent chatbots and share their experiences. Offer prizes for the most creative or helpful interactions.	Partner with influencers in your industry to promote appreciation cashback offers. Have influencers share their experiences with your brand and encourage their followers to participate in the cashback program.
Webinars	Events
Host webinars on laundry best practices, featuring the virtual laundry concierge as a guest speaker to provide personalized laundry care advice and answer customer questions.	Organize events or webinars to educate customers about the benefits of using energy-efficient washing machines and eco-friendly detergents. Showcase your commitment to sustainability and offer discounts on eco-friendly products.

Data Strategy

Business Outcome: Uber Clean aims to increase market share and revenue by offering personalized promotions and incentives to retain existing customers and attract new ones.

01

Hypothesis

- Tailoring promotions based on customer preferences and behavior will result in a 15% increase in customer retention and a 10% increase in new customer acquisition.

02

Data Collection

- Collect customer demographic data, order history, and interaction with promotions.
- Gather feedback from customer surveys and reviews to understand preferences and satisfaction levels.
- Utilize external data sources for market trends and competitor analysis.

03

Data Storage and Retrieval

- Strategy: Implement a scalable, batch database architecture for efficient storage and retrieval of customer data (OLAP).
- Considerations: Work with the engineering team to ensure data integrity, security, and compliance with regulations.

04

Data Utilization

- Analyze customer data to identify preferences, purchase behavior, and response to promotions.
- Develop segmentation models to target promotions effectively based on customer profiles.
- Utilize A/B testing to measure the effectiveness of different promotional strategies.

05

Competitive Advantage and Moat Building

- Building a comprehensive customer database enables targeted marketing campaigns and personalized experiences, fostering customer loyalty.
- Continuous analysis of customer feedback and market trends allows for rapid adaptation to changing consumer preferences.
- Developing algorithms and predictive models enhances the precision & efficiency of promotional strategies, creating a competitive edge in customer acquisition & retention.

ML/AI Strategy

Objective: Identify & develop strategy for reducing the fraudulent complaint by customers.

Expected ROI: Prevention of financial losses due to fraud, improved trust among users.

Effort: High. A robust fraud detection system requires sophisticated models, constant monitoring, & collaboration with security experts.
